

EuropaBio's

MOST INNOVATIVE
EUROPEAN BIOTECH
SME AWARD

2010

EUROPA^{BIO}

The EuropaBio Most Innovative EU Biotech SME Award was created to acknowledge:

- ✓ Contributions to smart, sustainable, inclusive growth
- ✓ Solutions to some of society's biggest challenges
- ✓ Determination, tenacity & brilliance

Criteria

- ✓ Response to social/environmental needs
- ✓ Creation of innovative solutions
- ✓ Business strategy evaluation
- ✓ Successes and challenges in raising capital

The Applications

- ✓ 32 applications
- ✓ 12 countries
- ✓ From 3 sectors (healthcare, industrial, and agricultural biotechnology)
- ✓ Micro, small and medium size enterprises

Judging Panel

- ✓ **Andrea Rappagliosi**
Vice-President, Government Affairs & Market Access and
Head of Brussels Office, GSK
Chair of EuropaBio
- ✓ **Paul Rübzig**
Member of the European Parliament
President of SME Global
- ✓ **Professor Reinhilde Veugelers**
KU Leuven and Bruegel Fellow
- ✓ **Tom Saylor**
CEO, Arecor
Chair of EuropaBio's SME Platform

5 Shortlisted Biotech SMEs

- ✓ **Addex Pharmaceuticals**(Switzerland/France)
- ✓ **AmSilk** (Germany)
- ✓ **KeyGene** (The Netherlands)
- ✓ **Prosensa** (The Netherlands)
- ✓ **TiGenix** (Belgium)

EU 2020 AND BEYOND
THE ROLE OF BIOTECHNOLOGY
IN EUROPE'S RESPONSIBLE INNOVATION

Addex Pharmaceuticals is devoted to industrializing discovery and development of allosteric modulators as medicines to treat diseases of the central nervous system, inflammation and metabolic disorders.

EU 2020 AND BEYOND
THE ROLE OF BIOTECHNOLOGY
IN EUROPE'S RESPONSIBLE INNOVATION

AMSilk is devoted to creating a new class of biopolymers emulating the natural silk proteins produced by spiders on an industrial scale for many applications in fibres, coatings, and films for pharmaceutical, cosmetic, composite and technical textile applications.

EU 2020 AND BEYOND
THE ROLE OF BIOTECHNOLOGY
IN EUROPE'S RESPONSIBLE INNOVATION

KeyGene is devoted to
developing molecular breeding solutions to produce
more efficient food, feed, fuel, fiber, flower and fun crops
with a lower environmental footprint.

EU 2020 AND BEYOND
THE ROLE OF BIOTECHNOLOGY
IN EUROPE'S RESPONSIBLE INNOVATION

Prosensa is focusing on the discovery, development and commercialisation of RNA (ribonucleic acid) modulating therapeutics targeting genetic disorders with a large unmet medical need, with a primary focus on neuromuscular and neurodegenerative life threatening disorders such as Duchenne Muscular Dystrophy, Myotonic Dystrophy, Huntington's disease and Spinal Muscular Atrophy

TIGENIX

TiGenix exploits the power of Regenerative Medicine, using proprietary cell and biomaterials platforms, to develop durable therapies for the repair of damaged or diseased skeletal tissues such as cartilage, meniscus, ligaments and bone.

The aim is a full restoration of the biological and mechanical functions of these tissues to prevent further degeneration of the joint and to halt the onset and progression of osteoarthritis.

Most Innovative SME Award

- ✓ 2 year EuropaBio membership
- ✓ Visibility in EU media
- ✓ A cash prize of €10 000
