

EFIB 2021 'Delivering the EU Green Deal: Industrial biotechnology into business': Registration is Open

NEWS RELEASE

Brussels, 19 May 2021

EFIB 2021 [registration is open](#) as of 19 May 2021.

6-7 October 2021, industry leaders, SMEs representatives, policy makers and academia are expected in Vienna, Austria to join Europe's leading event on industrial biotechnology and the bioeconomy under the title '**Delivering the EU Green Deal: Industrial biotechnology into business**'.

Industrial Biotechnology is currently worth €23 billion representing just 6% in sales of the overall worldwide chemicals market. However, it is significantly out-performing the overall chemicals market at an impressive 20% annual growth rate and has the potential to become the dominant technology of tomorrow's chemicals industry, representing a huge future opportunity.

In order to understand and overcome these challenges and prosper in tomorrow's bioeconomy, for more than ten years, industry experts throughout the vibrant and innovative biobased community have come together to one central location every year to discuss the key issues and gain a snapshot of the most significant developments on scale up of commercial biorefineries around the world.

Last year, we celebrated the Industrial biotech communities' latest achievements in harnessing the power of innovation to deliver solutions to global grand challenges. Influential brands and industry leaders met with a broad range of stakeholders and policy makers to discuss the transformative potential of Industrial Biotechnology to create a smarter and more sustainable future.

About EuropaBio

EuropaBio, the European Association for Bioindustries, promotes an innovative and dynamic European biotechnology industry. EuropaBio and its members are committed to the socially responsible use of biotechnology to improve quality of life, to prevent, diagnose, treat and cure diseases, to improve the quality and quantity of food and feedstuffs and to move towards a biobased and zero-waste economy. EuropaBio represents corporate and associate members across sectors, plus national and regional biotechnology associations which, in turn, represent over 2500 biotech SMEs.
