

STATEMENT

by EUROPABIO on the Russian Invasion of Ukraine

EuropaBio - The European Association for Bioindustries strongly condemns the Russian invasion of Ukraine. Our thoughts are with all Ukrainian people and those affected by this aggression.

EuropaBio will support people within and outside of Ukraine to the best of its ability, with support for refugee and medical charities. We are proud of the efforts of our staff who have personally supported refugees in Belgium and will also connect expertise between Members as best possible to enable the supply of medicines.

In the longer term, we will work to support the redevelopment of Ukrainian science.

We stand with Ukraine. Слава Україні.
