Europe must boost and attract investments in biotechnology.

- **Science**
  Multiply, attract, and retain investments to further strengthen Europe's scientific base that translate to technological and industrial progress.

- **Regulation**
  Ensure the EU’s regulatory framework attracts investments that can sustain and drive developments in healthcare biotechnology.

- **Infrastructure**
  Reinforce investment in the relationship of the scientific and industrial communities to nurture creation of healthcare biotechnology investment hubs.

- **Competitiveness**
  Encourage investments in healthcare biotechnology to increase Europe’s global competitiveness.

- **Growth**
  Invest in healthcare biotechnology as a key growth enabler for the European economy.

- **Accessibility**
  Strengthen Europe’s healthcare biotechnology value chains to ensure Europe’s patients can rapidly benefit from investment.
