

# Excellence

Europe must become a global center of excellence for biotechnology.

## ▶ Science

Foster a culture of scientific excellence in Europe that can be translated into tangible progress for patients.

## ▶ Regulation

Use the EU's regulatory framework to encourage and support excellence in basic and advanced research.

## ▶ Infrastructure

Strive to be a leader in the development of healthcare biotechnology underpinned by suitable infrastructures.

## ▶ Competitiveness

Attract and nurture excellence in biotechnology talent and skills to increase Europe's global competitiveness.

## ▶ Growth

Use Europe's scientific and industrial excellence to drive growth including through SMEs, and bring significant benefits to society.

## ▶ Accessibility

Place Europe as a centre of excellence to ensure rapid access for excellence for European patients.
