

## EuropaBio launches Industry Advisory Group for new Biomanufacturing Platform

### PRESS RELEASE

**Brussels, 17 January 2023** - An Industry Advisory Group (IAG) representing biotechnology across sectors, countries and through the innovation pathway has been launched to support EuropaBio's new Biomanufacturing Platform.

The IAG includes SMEs, mid and large sized companies, plus National associations, with the aim to ensure that biomanufacturing is recognised and supported as a significant part of Europe's economic growth in a rapidly accelerating global biomanufacturing market.

The 2023 IAG includes:

- Ana Sofia Antunes, Mab Design (FR)
- Audrey Bru, Lallemand (UK/FR)
- Inga Matijosyte, LBTA (LT)
- Matt Moran, IBEC (IRE)
- Sarah Moundir, Novartis (CH)
- Gwenaël Servant, Abolis (FR)
- Sabrina Spina, Olon (IT)
- Peter Steen Mortensen, Novozymes (DK)
- Tineke Van hooland, Bio.be (BE)

The IAG kick starts the Biomanufacturing Platform growth in 2023, with the Biomanufacturing Policy Summit hosted on March 15 in Brussels. The Group will ensure industry-relevant definitions, vision, case studies and recommendations to policy stakeholders at national and European level so that Europe is globally competitive.

Biomanufacturing is already present within most sectors, whether product or process-based, including advanced therapies such as cell and gene therapy, food, materials and industry intermediates. It provides significant employment and economic growth, as Europe strives to meet the Green Deal and deliver advanced healthcare particularly in response to unmet needs such as those within rare diseases.

Dr Virginia Claudio, EuropaBio Senior Adviser and Programme Manager said "Biomanufacturing investments are of paramount importance for EU tech sovereignty and quality of life of EU citizens. The IAG behind the Biomanufacturing Platform brings the voices of industry and economic development for Europe and will ensure that it is always at the forefront of Europe's policy priorities."

### About EuropaBio

EuropaBio, the European Association for Bioindustries, promotes an innovative and dynamic European biotechnology industry. EuropaBio and its members are committed to the socially responsible use of biotechnology to improve quality of life; to prevent, diagnose, treat, and cure diseases; to improve the quality and quantity of food and feedstuffs and to move towards a biobased and zero-waste economy. EuropaBio represents corporate and associate members, plus national biotechnology associations and bioregions.
