

Syensqo joins EuropaBio: Accelerating Innovation in Biotechnology

PRESS RELEASE

Brussels, 5 April 2024 - EuropaBio, is very pleased to announce the newest addition to its membership, Syensqo.

With a rich history dating back to 1863 and boasting a global team of 13000+ associates in over 30 countries, Syensqo is inspired by the scientific councils, which were initiated by Ernest Solvay.

Syensqo's technologies bring benefits to many aspects of daily life. Their innovative solutions contribute to safer, cleaner, and more sustainable products found in homes, food and consumer goods, planes, cars, batteries, smart devices and health care applications. Their mission is to revolutionise the way we live through their groundbreaking technologies, advancing human progress while cultivating a future for our planet that is not only safer and cleaner, but also inherently more sustainable.

With EuropaBio, Syensqo will help to champion a more sustainable future using biotechnology and biomanufacturing to improve human lives.

Dr. Claire Skentelbery, Director General of EuropaBio had this to say: *"We are delighted to welcome Syensqo to the EuropaBio community. It is representative of industrial transition and focus into biotechnology as a fundamental component of future society, economy and sustainability. Together we build Europe's future."*

Thomas Canova, Executive Vice-President, Head of Renewable Materials & Biotechnology Growth Platform at Syensqo said *"Syensqo is proud to join EuropaBio and work alongside other leading companies and experts in biotechnology. We believe that through collaboration and dialogue, we can create a strong European strategy to address the pressing challenges our society is facing today. Joining EuropaBio reflects our commitment to sustainability, innovation, and advancing humanity through biotechnology."*

About EuropaBio

EuropaBio, the European Association for Bioindustries, promotes an innovative and dynamic European biotechnology industry. EuropaBio and its members are committed to the socially responsible use of biotechnology to improve quality of life; to prevent, diagnose, treat, and cure diseases; to improve the quality and quantity of food and feedstuffs and to move towards a biobased and zero-waste economy. EuropaBio represents corporate and associate members, plus national biotechnology associations and bioregions. Read more about our work at www.europabio.org.
